JPL Stories

Crossing the Pond for an Encounter with Comet Hartley 2

Presented by Doug Ellison, Visualization Producer,
Visualization Technology Applications & Development Group

Come hear the story of a British space enthusiast who went from using Photoshop in his shed to directing visualizations for EPOXI, Stardust NExT and MSL. This 10 year journey shines new light on how JPL perceives the public, and how the public perceives JPL. What does it take to turn a hobby into a career? How does that shift change your perspective on what we do, how we do it and how we share it with the world?
